Description

The submission for this assignment will be a link to your active github page in the showbie folder titled 1.02 - Website

Your job is to code a website hosted on github that has the following pages:

- Landing Page
 - This page can be formatted however you like but it needs to contain the following:
 - Navigation Bar
 - Title Banner
 - Body with links for each of the minor projects
 - Principles, Practices, Project Management (Web Design)
 - Computer Aided Design
 - Computer Controlled Cutting
 - Electronics Production
 - 3D Scanning and Printing
 - Embedded Programming
 - Electronics Design
 - Output Devices
 - Mechanical Design
 - Input Devices
 - Molding and Casting
 - Networking and Communications
 - Interface and Application Programming
 - Link in banner or body for final project
 - About Me page
- About Me page
 - Write 1-2 paragraphs about yourself. Pretend that this is a LinkedIn summary. Feel free to add in some hobbies, sports, and things that you enjoy doing
- Final Project Page
 - This page should be relatively empty, but you should add in information on the problem you have chosen to pursue.
 - Inside of the final project page you should have links that lead to the following pages:
 - Component 2: Problem Validation
 - Component 3: Solution Design

- Component 4: Prototyping and Testing
- Component 5: Project and Process Evaluation
- Component 6: Design Presentation
- Inside of your menu page, create a 404 page, link ALL pages that you do not have information on to this 044 page
